2. Developing a list of relevant organizations and choosing the relevant documents from their archives.

a. Following the structure of given organization's outlets (resolutions > report > press release, etc.) and going from top to bottom to identify documents that fit the following criteria:

- i. Should explicitly concern media workers and not civilians in general
- ii. European or world-wide scope (not documents that concern only other parts of the world) – only safety of journalists working in Europe, or also European journalists working in other places?
- iii. Concerns negative physical and psychological consequences of media work

b. Current limitations
